

Subject content	As a result, what students should know /understood	What students should be able to do	How students will be assessed	By when
The Coastal Zone				
Background theory	Understand the weathering process Understand the mass movement processes Understand the characteristics of constructive and destructive waves Understand the processes of coastal erosion Understand deposition and explain the reasons for it	<i>Explain the processes of coastal transportation – longshore drift, traction, saltation, suspension and solution</i>	Past exam question Quiz	1
Landforms resulting from erosion	Understand the characteristics and formation of headlands and bays Understand the characteristics and formation of cliffs and wave cut platforms Understand the characteristics and formation of caves, arches and stacks	<i>Describe and explain the characteristics and formation of headlands and bays Describe and explain the characteristics and formation of cliffs and wave cut platforms Describe and explain the characteristics and formation of caves, arches and stacks</i>	Class discussion	1
Landforms resulting from deposition	Understand the formation of beaches, spits and bars	<i>Describe and explain the formation of beaches, spits and bars. Explain the reasons for rising sea levels</i>		1
Coastal Flooding	Understand the social, economic, environmental and political impact of coastal flooding	<i>Discuss the social, economic, environmental and political impact of coastal flooding</i>	Presentations	1
Cliff collapse	Know and understand a case study of an area of recent or threatened cliff collapse.	<i>Describe rates of coastal erosion and explain reasons why some areas are more susceptible to undercutting by the sea and collapse, how people worsen the situation and the impact on people's lives and environment</i>	Letter to 'Mr Rudge senior'	1
Engineering strategies	Understand the hard engineering strategies Understand the soft engineering strategies Managed retreat Know a case study of coastal management to assess the costs and benefits of the strategies adopted	<i>Compare effectiveness of hard and soft coastal management strategies with clear reference to examples.</i>	Past exam question	2
Coastal conservation	Know a case study of a coastal habitat Strategies to ensure the environment is conserved but also allows sustainable use of the area	Apply the case study of a coastal habitat to an exam question relating to sustainable conservation.	Class discussion	2

Tourism				
Background theory	<p>Give a variety of reasons for the global increase in tourism.</p> <p>Understand the potential of cities, mountains and coastal areas for the development of tourism.</p> <p>Understand the importance of tourism to economies in contrasting areas of the world.</p> <p>Understand how tourism contributes to the UK economy.</p> <p>Understand the impact of external factors on visitor numbers to the UK.</p>	<p>Explain the potential of cities, mountains and coastal areas for the development of tourism.</p> <p>Explain the importance of tourism to economies in contrasting areas of the world.</p> <p>Explain how tourism contributes to the UK economy.</p> <p>Explain the impact of external factors on visitor numbers to the UK.</p>	Past exam question	2
UK NATIONAL PARK	Learn a case study for a UK National Park.	<p>Explain why it's grown as a tourist destination.</p> <p>Explain the effectiveness of the strategies to cope with the large number of tourists.</p>	Leaflet	3
UK COASTAL AREA	Know a case study for a UK coastal area.	<p>Explain why it's grown as a tourist destination.</p> <p>Describe and explain the tourist area/resort life cycle model specifically for this area.</p> <p>Explain the effectiveness of the strategies to cope with the large number of tourists.</p> <p>Describe the plans to ensure the continued success of the tourism industry in the area.</p>	Past exam question	3
MASS TOURISM	<p>Know the meaning of mass tourism.</p> <p>I know a case study of a tropical tourist area which attracts large number of visitors.</p>	<p>Explain the positive and negative effects of mass tourism on the economy and the environment.</p> <p>Describe and explain the strategies for maintaining tourism in the area and reducing its negative effects.</p>	Discussion	3
EXTREME ENVIRONMENTS	Know a case study of an extreme environment.	<p>Describe the attractions of extreme environments to tourists.</p> <p>Explain the increased demand for adventure holidays.</p> <p>Explain the impact of tourism on an extreme environment.</p> <p>Explain the extent to which the area can cope with the development of the tourist industry.</p>	Past exam question	3
ECOTOURISM	<p>Know the meaning of the term ecotourism.</p> <p>Know a case study of ecotourism.</p> <p>Understand how this can contribute to sustainable development.</p>	<p>Explain the need for conservation and stewardship.</p> <p>Explain how ecotourism can benefit the local economy, the environment and the lives of the people.</p>	Research poster	3
Globalisation				
Manufacturing and	Understand how ICT has influenced the development of	Explain why call centres have moved abroad.	Past exam	4

services have developed throughout the world	localised industrial regions Know one case study for Transnational corporations.	Explain the advantages and disadvantages of Transnational corporations.	question	
The importance of manufacturing in different countries is changing	Understand why there is industrial growth in some parts of the world and de-industrialisation in other parts.	Describe and explain the effects of government legislation, long working hours, health and safety regulations, prohibition of strikes and tax incentives and tax free zones. Explain why China has grown as an economic giant.	Past exam question	4
The increasing global demand for energy	Understand the impact of world population growth, increased wealth and technological advances on the global demand for energy.	Explain the impact of world population growth, increased wealth and technological advances on the global demand for energy. Describe and explain the social, economic and environmental impact of increased energy use.	Class discussion	4
Sustainable development	Know a case study for one type of renewable energy. Understand the importance of international directives on pollution control and carbon reducing initiatives.	Explain how sustainable development can be achieved through renewable energy. Explain how the costs of globalisation are reduced both locally (recycling/landfill) and globally (carbon credits)	Group discussion	4
The impact of Food Miles	Understand the environmental impacts of food production. Understand the political impacts of water control Understand the social impacts of farming. Understand the economic impacts including the increase in rural debt due to increasing need for fertiliser, pesticide and insecticide	Explain the costs and benefits of importing food versus local energy intensive food production. Describe the hostilities between countries over the control of water for irrigation. Explain the impact of development of cash crop farming on a subsistence economy. Explain why we should encourage the increase in use of locally produced food.	Past exam question	4
